DACP

Data Access and Collaboration Protocol

Collaborate across autonomous data nodes.

Read data. Connect operators. Stream results.

AUTONOMOUS DATA

Publish datasets with pluggable catalogs.

Access nodes independently or through Union.

STREAMING JOBS

Connect operator ports in YAML.

Read bytes or records. Receive live results.

FLEXIBLE OPERATORS

Java / Scala, Python and native commands.

Browse reusable operators. and source code.

EXECUTION CONTROL

Use variables, timeouts and retry policies.

Choose materialization and replay when needed.

Monitor job DAGs, node health and transfer rates.

Server / Union / Client SDK / Shell
